

Financial Health Is a Right

Not a Privilege • A 501(c)(3) Nonprofit • Since 2017

We build economic mobility infrastructure.

The affordability crisis is a mobility crisis. FinMango uses data and technology to fix the systemic barriers — housing, healthcare, debt, and predatory lending — crushing the financial health of young adults and vulnerable communities.

Research

We identify the systemic barriers blocking economic mobility. Partnerships with Google Health and academic institutions build the evidence base policymakers need to act.

Education

We equip the next generation to climb — reaching students before student loans, before credit cards. Free programs span income levels, from suburbs to inner-city schools.

Advocacy

Education alone won't open the ladder. Our global ambassador network drives policy change on structural barriers no amount of budgeting advice can solve.

What We Build

- **Free financial tools** — calculators, simulators & games
- **Open curriculum** for educators and students
- **Barrier Breakers** — youth innovation challenge
- **Ambassador Program** — a global advocacy network
- **Intelligence Platform** — open economic data

The Problem We're Solving

- **63%** of Americans can't cover a \$500 emergency
- **56%** of young adults report financial stress harming mental health
- **31%** still believe the American Dream holds true
- The affordability crisis is, at its core, a mobility crisis

Who We Serve

Students & Young Adults

Reaching learners before debt locks in, with tools and lessons built for real life.

Educators & Schools

Free, ready-to-teach financial health resources for classrooms everywhere.

Vulnerable Communities

Research and advocacy that targets the structural barriers to upward mobility.
